Staghorn Sumac	Dry	full	Slope stabilization	Little Bluestem	Dry	full-partial	Orange-bronze color
Prairie Rose	Dry	full	Light pink, med sized				

***Wildlife packet:** 2 high-bush cranberry, 2 mountain ash, 2 American plum, 2 juneberry, 2 chokecherry.

***Low Bush Blueberry note:** It's recommended that compost and/or pine needles be incorporated into the soil, to provide adequate acidity.

***Upland seed mix:** Each unit is intended to cover 500 sq ft. 60% - 4 showy grass species, and 40% - 23 species of wildflowers. Seeding instructions will be provided with the seed packet.

***Wetland seed mix:** Each unit will cover 500 square feet. 90% - 14 species of grasses, sedges & bulrushes, and 10% - 18 species of wildflowers. Intended for wetland and shoreline plantings. Seeding instructions will be provided with the seed packet.

***Tree Shelters:** Yellow plastic mesh, 36 inches tall and 4 inches in diameter; each comes with a bamboo stake for securing.

***Plantskydd deer repellent:** Plantskydd is a blood derivative which triggers a predatory reaction, and deer are deterred by the smell. It typically needs to be applied spring & fall, & 1 quart treats 100 plants, 1 foot tall. The 1 lb powder concentrate mixes to make 4 quarts.

***Repellex deer repellent:** Repellex is a pill-like tablet added to the soil when planting. Gives plants a hot pepper taste that deters deer and rabbits. One tablet per foot of plant height until out of browse height.
